Neovena
Digital Print Technology

Next-Generation, printed surface technology

Kaya Surfaces represents the next generation in premium decorative surface design, a fusion of NEOVENA digital print technology and VCS (Vitrified Compact Stone) engineering.

Breakthrough technology

This breakthrough innovation captures the beauty and movement of natural stone while delivering exceptional durability and sustainability. Kaya Surfaces, featuring NEOVENA™ digital print technology, brings veins to life with remarkable depth and realism. Acute edge vein definition allows veins to flow naturally through edges, creating a refined and authentic aesthetic. Designed for Australia's zero-silica future, Kaya blends advanced vitrification with enduring strength and conscious design

Offering exceptional performance and strength

Experience the artistry of nature, perfected by NEOVENA digital print technology. Kaya Surfaces merges the refined beauty of natural stone with the engineered strength of VCS (Vitrified Compact Surface) technology. Fired at over 190°C, each slab delivers exceptional hardness, impact resistance, and thermal stability, designed to perform beautifully under everyday demands. Elegant, consistent, and built to endure, Kaya sets a new standard in performance, sustainability, and architectural refinement.

Spill Resistant

Thanks to high spill resistance technology, cleaning up those small marks and stubborn spots is a breeze with Kaya Surfaces.

Stain Resistant

A near care-free surface that doesn't require any sealing or ongoing treatments making it ideal for any internal application.

Environmentally Friendly

With recycled ingredients and a sustainable design ethos, Kaya Surfaces truly is a decorative material with purpose.

Heat Resistant

High heat resistance mean Kaya Surfaces is ideal for internal applications like benchtops, Splashbacks and higher heat areas.

Scratch Resistant

Unlike its natural counterparts, Kaya Surfaces contains impressive scratch resistant properties, perfect for whatever life can throw at it.

10 Year Warranty

Covered by our ten year warranty, you can rest assured that your Kaya Surfaces product will remain beautiful for many years to come.

NEOVENA Digital Print Technology

Neovena Digital Print Technology, Kaya Surfaces showcases the most realistic digital print available, combined with exceptional durability and sustainability.

Crafting with Kaya

Kaya Surfaces showcases NEOVENA digital print technology, delivering next-generation authentic vein designs with exceptional visual depth.

The digitally printed design is applied to the slab face only.

Subtle vein detailing beneath the surface enhances the natural depth and movement of each slab. To achieve the most refined aesthetic, some clients may choose a mitred edge of 40 mm or greater, along with a drop-in sink, allowing the design to be showcased at its best.

Kaya Surfaces is designed for indoor applications only and is heat-sensitive; as with all Vitriified Compact Surfaces, exposure to extreme temperatures may result in thermal shock, cracking.

10 Year Peace of Mind Warranty

Unlike natural marble, Kaya Surfaces does not require sealing or regular maintenance, making it a practical, durable and affordable solution for your home or project. Kaya Surfaces is not indestructible, but it is tough - with high durability against heat, scratching, chips and stains all Kaya Surfaces products come with our 10 year peace of mind warranty.

Care & Maintenance

Receiving your complimentary cleaning and care kit

Kaya Surfaces requires minimal maintenance to keep your surface looking as good as new. When you register your Kaya Surfaces product within 30 days, you will receive your complimentary cleaning and care kit. Using the contents contained within on a regular basis will help ensure the long lasting life of your Kaya Surfaces product.

How to Care for Your Benchtop

Everyday polished and matte bench-top cleaning requires no more than soapy water and a clean microfiber cloth.

To manage those stubborn marks or spills on polished bench-tops, do the following:

1. With the contents of your care and maintenance box, wet and wash your microfiber cloth, ensuring it is clean and free of any debris.
2. Place a small, twenty cent piece size drop of cream cleanser on your benchtop and wipe in small circular motions with your microfiber cloth and create a lather.
3. Avoid heavy rubbing in the same area to prevent any etch or scuff marks appearing.
4. Once the area is clean, wipe excess cleanser away with a wet and clean microfiber cloth or paper towel.

General tips for using your Kaya Surfaces bench-tops

1. Always use a chopping board when chopping food to avoid any unwanted scratches.
2. If your pots and pans are too hot to touch, they are too hot for your bench-top. Always use heat trivets or chopping boards to place any hot items directly on your bench-top surface.

Clean & damp Microfiber cloth

Wet the area to be cleaned

Apply 20c size drop of cleanser

Wipe in gentle circular motions

Wipe away any excess cleanser
